THE FINE PRINT:

THE FINE PRINT: ¹ Not available in all areas or to all customers. ² Power Networkx will provide you with a carrier grade Fibre Ethernet service, delivered from an NBN Co Fibre Access Node (FAN) directly to the premises. ³ Power Networkx, via NBN Co, will provide a Network Terminating Device (NTD) used to facilitate connection to the network. This NTD is owned by NBN Co and must be returned to Power Networkx or NBN Co on termination of the service. The cabling that is required in your premises beyond the Network Boundary Point is your cost and responsibility. ⁴ You may use your own router provided it is compatible with our service; however this means that you will be responsible for the configuration and management of the router. Alternatively you may purchase your router from us. ⁵ You must obtain the consent of the property owner to have the NBN installation performed. ⁶ Speeds are best effort only and are not guaranteed. Speeds can be affected, within reason, by many factors such as, but not limited to; network utilisation, your equipment, software and internet traffic, and fibre transmission overheads. ⁷ Typical installations take 6 to 18 weeks to complete, depending on the level of work required. Power Networkx Ltd ABN 84 620 741 639
