THE FINE PRINT:

¹ Not available in all areas or to all customers. ² Power Network will provide you with a fibre internet connection, delivered over the Telstra fibre network. ³ Power Network, via Telstra, will provide a Network Terminating Device (NTD) used to facilitate connection to the network. The cabling that is required in your premises beyond the Network Boundary Point is your cost and responsibility. ⁴ You may use your own router provided it is compatible with our service; however this means that you will be responsible for the configuration and management of the router. Alternatively you may purchase your router from us. ⁵ You must obtain the consent of the property owner to have the Fibre installation performed. ⁶ This service is delivered using a Standard Class of Service (CoS). Speeds using this Service Class are symmetrical and are best effort only (120 CIR:PIR). Speeds can be affected, within reason, by many factors such as, but not limited to; network utilisation, your equipment, software and internet traffic, and fibre transmission overheads. ⁷ Typical installations take 6 to 18 weeks to complete, depending on the level of work required. Power Network Ltd ABN 84 620 741 639
