OTHER INFORMATION

SERVICE SPEEDS

Any speeds mentioned are only an indication of what you may experience on your service. Your speed will be affected by factors including the technology over which services are delivered to your premises, network configuration and traffic management (particularly during peak periods when more people are online), the nbn™ powered plan you choose, the performance of your modem, Wi-Fi, cabling, and other devices in your premises.

You will experience download speeds below 130Mbps on nbn™ Wireless Plus and below 250Mbps on nbn™ Wireless Home Fast and below 400Mbps on nbn™ Wireless Superfast. Your speed will be particularly affected even further during peak usage times (7pm to 11pm).

CONNECTION TIMEFRAMES

Typical installations take between 1 day and 4 weeks to complete. Timeframes can depend on building management approval, site access and nbn technology type.
